

# A new class of universal reference EVs

01

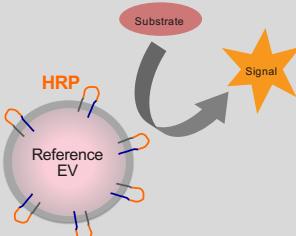

## Addressing unsolved problems in EV research & diagnostics

Extracellular vesicles (EVs) hold great promise as circulating biomarkers of disease ('liquid biopsy') but both, their clinical usage as well as scientific progress in the field are significantly hampered by the lack of reliable reference EVs that allow for intra- and inter-experimental normalization and standardization.

**A new class of reference EVs with horseradish peroxidase (HRP) on their surface!**

**HRP<sup>+</sup> reference EVs are:**

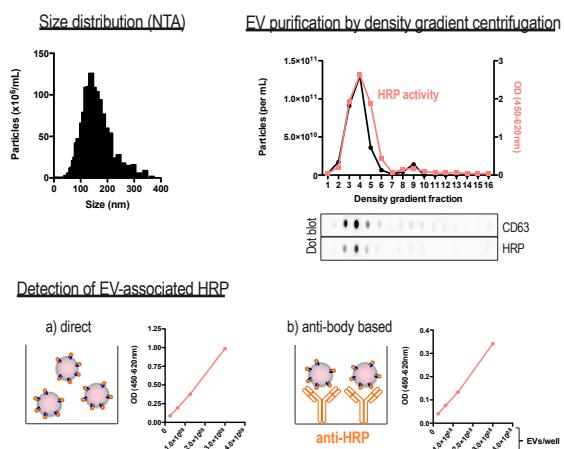

- ✓ 100% pure and homogeneous
- ✓ easy to detect
- ✓ easy to quantify: add HRP substrate
- ✓ of superior sensitivity
- ✓ affordable and available
- ✓ stable in complex medical samples
- ✓ free of any serum EVs

TECHNOLOGY

03

## Characterization of HRP<sup>+</sup> reference EVs

CHARACTERIZATION & EXAMPLES

04

SUMMARY

02

## HRP<sup>+</sup> reference EVs allow:

### EV TRACING

Trace EVs through various isolation techniques,  
Quality control

### NORMALIZATION

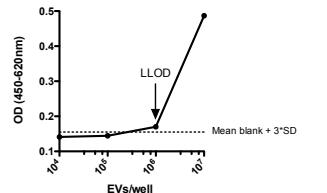

Normalize clinical specimens, compensate technical variation,  
Back-calculate the total EV numbers in biological samples

### PROCESS DEVELOPMENT

Standardize your protocols and SOPs,  
Calculate the yield after EV purification

Superior sensitivity of detection:

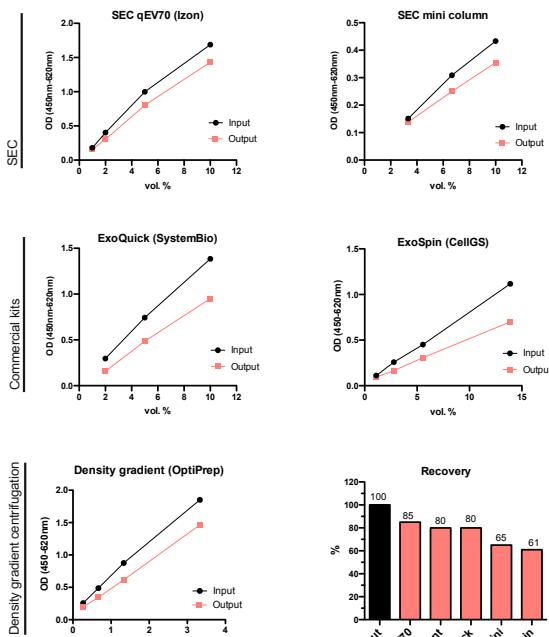

LLOD: ~  $10^6$  EVs\*

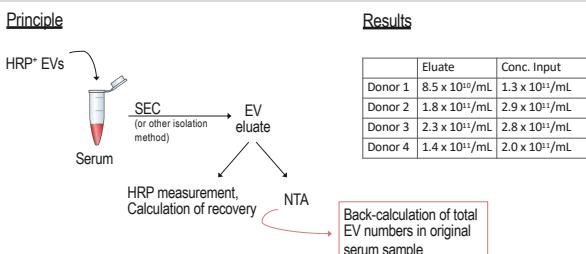

\*diluted in PBS or serum

## Example I: EV recovery using different isolation methods

Input: Serum spiked with HRP<sup>+</sup> EVs (20 mU per mL serum, equals ~3 x 10<sup>9</sup> EVs)

## Example II: Quantification of EV numbers in complex biological samples

## HRP<sup>+</sup> reference EVs

### Product Specification:

- ✓ Defined HRP activity (U/mL)
- ✓ Stability
- ✓ Lyophilized storage
- ✓ Distinguishable from sample EVs

The lack of affordable, well-characterized and easy-to-use universal reference EVs is a significant shortcoming that hampers scientific progress and the development of EV-based diagnostics.

**Our newly designed, HRP<sup>+</sup> reference EVs are a big step towards standardization and harmonization of the field.**
